**SUBJECT: INTELEPEER, INC. APPLICATION FOR A CERTIFICATE OF PUBLIC
CONVENIENCE AND NECESSITY, CASE NO. IPI-T-09-01**

On December 17, 2009, IntelPeer, Inc. filed an Application for a Certificate of Public Convenience and Necessity (CPCN) to provide facilities-based and resold local exchange and access telecommunications services in the State of Idaho. The Application states that the Company intends to provide basic local exchange services, custom calling features, and interexchange toll services (including toll free services) to business and residential customers.

The Company intends to offer service in the areas served by Qwest and does not plan to provide service in areas of any small or rural local exchange carriers. Its Application states that the Company initially intends to provide toll services through the Company's underlying long-distance carrier. However, the Company seeks authority to provide the full range of resold and facilities-based local exchange and interexchange services so that it retains flexibility in providing its services in the future.

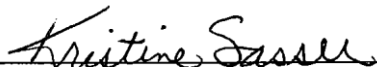

The Company asserts that its expertise in telecommunications will permit it to select the most economical and efficient services, thereby providing customers with an excellent combination of price, quality, and customer service. The Company states that it possesses the requisite financial, managerial, and technical capacities to provide the proposed services. IntelPeer is a corporation organized under the laws of Delaware and authorized to transact business as a foreign corporation in Idaho.

STAFF RECOMMENDATION

Staff recommends that the Application be processed by Modified Procedure.

COMMISSION DECISION

Does the Commission wish to process IntelPeer's Application for a Certificate of Public Convenience and Necessity by Modified Procedure?
